

# ReachDisplay™ GeoFence Mobile Ads & GeoLocation

Reach the right local prospects with mobile ads where they physically spend time and drive them to your business. Plus, you can even tie in-person visits back to your ads. All in one affordable mobile advertising solution.

*We tag targeted local audiences using their phone when they are near you (or a competitor!)*

*Your ads attract people when they're using mobile apps and mobile web browsers in specific locations.*

*We uniquely track your in-person visits and attribute them back to your mobile ads.*

## Reaching local prospects takes more than direct mail or social media posts.

### Target with Pinpoint Accuracy

With our advanced geolocation technology, finding the right audience is no longer a guessing game. Reach exactly who you want by targeting audiences in locations as small as a single building and its parking lot, or entire neighborhoods.

### Draw Attendance to Special Events

Your ads reach target users for up to 30 days after they are tagged. This makes our mobile advertising ideal for promoting events, sales, new stores, seasonal offers, and more! This creates even more chances for prospects to see your ad and visit you.

### Build Awareness in One Area or Many

With so many places to target your audience, why limit your options? Capture audiences wherever they go - like your own business, direct competitors, local hangouts, and more. Whether you want to target people in one location or 1500, we can help you grow.

### Uniquely Track In-Person Visits

We have an exclusive ability to track actual walk-ins to your store, office, event, or other physical location and tie those walk-ins back to views or clicks on your ad. We'll send you reports every 30 days so you can see your traffic firsthand.

### Gain the Mobile Advantage

Local consumers are on their mobile devices all the time! Targeting ads to these engaged, on-the-go consumers can mean more awareness and in-person traffic for your local business. This is a huge advantage when your competitors aren't even reaching them this way.

### Get Expert Setup and Service

Best of all, there's no software to install or complicated setup required to get started. Just give us your ad creative and list of target areas, and we'll do the rest. Check your performance at any time with on-demand metrics like ad views, clicks, and budget spend.
